SUJAN BHOWMIK

Computer Science & Engineering Undergraduate | Software Developer & AI Systems

Location: Medinipur, West Bengal, India **Phone:** +91 8944887015 **Email:** ytmrsujan@gmail.com
LinkedIn: linkedin.com/in/sujan-bhowmik-5b195337 **GitHub:** github.com/sujanbhowmik12

EXECUTIVE PROFILE

Academically distinguished Computer Science and Engineering undergraduate at Adamas University, maintaining a **9.2** / **10 CGPA**. Demonstrates a solid foundation in core software engineering principles, algorithm design, object-oriented methodologies, and relational database systems. Actively developing practical engineering solutions spanning intelligent autonomous AI agents, enterprise workflow utilities, and responsive web platforms. Combines analytical rigor with hands-on system building across C++, Java, and modern development environments to engineer clean, maintainable software architectures.

EDUCATION & ACADEMIC BACKGROUND

Adamas University

2025 – 2029
Kolkata, West Bengal

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Academic Standing: Second Year Student | First-Year Average CGPA: **9.2** / **10**

Patna Vivekananda Sikshaniketan

Completed: 2025
Paschim Medinipur, West Bengal

Higher Secondary Education (Class XII - Science Stream)

Academic Performance: Score: **85.4%** (Distinction)

- Completed secondary and higher secondary science education with focus on analytical problem-solving.
- Built foundational academic discipline contributing directly to sustained distinction in engineering studies.

TECHNICAL COMPETENCIES & TOOLCHAIN

Programming Languages	**C++, Java, C, SQL**
Core Computer Science	Data Structures & Algorithms, Object-Oriented Programming (OOP), Algorithmic Complexity (Big-O), Memory Management
Databases & Data Systems	SQL, Relational Schema Normalization, Query Optimization, CRUD Operations, ACID Properties
AI & Machine Learning	AI Agent System Design, Task-Oriented Workflow Automation, Autonomous Decision Frameworks
Web & Software Dev	Frontend Web Development, User Interface Design, Component Structuring, RESTful API Integration
Tools & Environments	Git, GitHub, VS Code, Linux/Unix Terminal, Vercel Deployment Platform

FEATURED ENGINEERING PROJECTS

ZOYA — Autonomous AI Agent System

2026

Architect & Lead Developer | AI Agent Frameworks, Task Automation

- **Architecture & Design:** Engineered an autonomous, task-oriented AI agent designed to parse multi-step user instructions, break them into structured execution paths, and trigger programmatic workflows.
- **Decision Routing & Logic:** Implemented contextual routing heuristics enabling dynamic query resolution, intent classification, and automated fallback handling for unhandled exceptions.
- **Practical Utilities:** Integrated external tool invocation capabilities, allowing the agent to perform real-time data lookups, structured summaries, and file operations.
- **Optimization & Reliability:** Refined agent response pipelines to minimize latency and maintain deterministic state control throughout continuous user sessions.

YTMR-LPG — Enterprise Distribution & Customer Management System

2025 – 2026

Full-Cycle Developer | C++, Object-Oriented Software Design, SQL & File Persistence

- **Domain Modeling:** Developed a complete software solution modeled for domestic LPG supply networks, handling consumer registrations, quota allocations, cylinder refills, and billing workflows.
- **Object-Oriented Architecture:** Applied encapsulation, inheritance, and modular separation across customer entities, distributor stocks, transactional logs, and ledger modules.
- **Data Integrity & Validation:** Implemented defensive input validation and structured data persistence routines to avoid duplicate bookings, invalid identification entries, and stock mismatches.
- **Operational Dashboard:** Designed an intuitive console-based interface providing administrative oversight, real-time inventory tracking, and transaction verification.

Dynamic Personal Portfolio & Interactive Web Platform

2026

Frontend Developer | HTML5, CSS3, Modern JavaScript, Vercel, Git

- **Responsive Interface Design:** Built a modern personal web platform featuring clean visual hierarchy, modular styling, and seamless cross-device responsiveness.
- **Client Communication:** Integrated third-party client API hooks to process direct user inquiries asynchronously with real-time field validation.
- **Deployment & Version Control:** Maintained continuous automated deployments via GitHub integrated directly with Vercel for instant updates and zero-downtime hosting.

CERTIFICATIONS & INDUSTRY CREDENTIALS

NASSCOM Certification

Accredited

National Association of Software and Service Companies (NASSCOM)

Standardized national industry certification affirming core competency in digital software technologies, algorithmic problem solving, and modern workplace computing practices.

Programming in Modern C++

Certified

NPTEL — National Programme on Technology Enhanced Learning

Multi-week certification course covering modern C++ standards, Standard Template Library (STL), memory management, templates, and advanced object-oriented design patterns.

Generative AI & Big Data Analytics Fundamentals

Certified

Professional Development Track

Specialized training focusing on large language model workflows, autonomous prompt construction, and big data analysis frameworks.

ACHIEVEMENTS & EXTRACURRICULAR ENGAGEMENTS

Academic Distinction — 9.2 CGPA

Maintained a top-tier academic record during the first year of B.Tech CSE at Adamas University, demonstrating strong dedication to foundational engineering principles.

Continuous Algorithmic Problem Solving

Actively solving challenges on LeetCode and online platforms, strengthening algorithmic optimization, dynamic structures, and clean coding practices.

Technical Hands-On Workshops

Participated in hands-on university engineering laboratory sessions and prototyping workshops covering digital circuits and computational systems.

Project Collaboration & Open Source

Actively contributing code repositories to GitHub, practicing version control etiquette, feature branching, and structured documentation.

LANGUAGES & COMMUNICATION

English	Professional Working Proficiency (Technical documentation, presentations, and technical communication)
Hindi	Professional Working Proficiency (Collaborative team communication)
Bengali	Native / Full Professional Proficiency

Declaration: I hereby declare that the details provided above are authentic and complete to the best of my knowledge. Project code repositories and academic transcripts are available upon request.
